in Neuro Linguistic Programming

RAGLAN

Ready to supercharge your personal and professional development?

Join us for an 18-day, internationally recognised and certified NLP Practitioner Training. Throughout this immersive course, you'll gain invaluable skills applicable to all facets of life. Enhance your Emotional Intelligence (EQ) and turbocharge your people skills! If you have coaching or development responsibilities, these skills will become indispensable tools in your toolkit.

What Is NLP?

NLP, or Neuro Linguistic Programming, is the study of how people "know what they know and do what they do." It consists of a suite of proven techniques that consistently effect deep and lasting behavioural change. You'll integrate various approaches, truly living them. By mastering the principles that drive human behaviour, you'll transform not only your mindset but also your actions – including any you'd like to improve.

Mastering People Skills

Contrary to popular opinion, you can't treat everyone as you want to be treated. Well, you can—and you possibly have—but don't expect them to react the way that you would respond. People react in their own unique (and sometimes infuriating!) ways. Through NLP, you'll learn how to effectively navigate these differences.

How Do You Effect Change?

It all starts with you. By tapping into your hidden strengths and potential, you break through barriers and develop flexible new ways of thinking and being. Many participants notice increased optimism and confidence, which naturally and positively influence others. You'll also acquire skills to lead and coach people effectively.

Effectiveness And Success Go Hand In Hand

Whether dealing with staff, colleagues, partners, kids, trainees, customers, or even your boss, influence and persuasion are key. Without these skills, your effectiveness and success are limited.

With NLP strategies and tools, you'll make lasting changes and discover a newfound sense of self and authenticity. The resulting improvements will enhance all your relationships. ([Check out the testimonials](#) on the website for stories from past participants.)

Structured Training

The Inside Your Mind course is conveniently divided into three 6-day modules, allowing you to fit the training into your schedule and integrate the skills between sessions. Each module builds on the previous one, so completing them in order is essential.
